DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takahashi et al., 5,442,003 (Takahashi).

Takahashi discloses aramid fibrils produced by a process that comprising polymerizing an aromatic diamine in an aromatic dicarboxylic acid halide, spinning to dope in a process that is substantially similar to that contemplated by applicants in present claims 4-6. Accordingly, the examiner has reason to believe that properties such as the CSF and SSA (claims 1-2) would be the same or substantially similar to those set forth by applicants, in the absence of factual evidence to the contrary. Regarding claims 9-16, Takahashi teaches that aramid paper having long breaking strength can be produced. Hence, the formation of paper would have been an obvious expedient to the skilled artisan.

Therefore, the teachings of Takahashi would have rendered obvious the invention as claimed in present claims 1-16.

No claims are allowed.
